

Ithamar Nyangu

Software Developer and Digital Health Professional

Lusaka Zambia | 0979511258 | ithamarnyangu@gmail.com | ithamarnyangu.github.io/portfolio

PROFESSIONAL PROFILE

Software Engineer with 4+ years of progressive experience in software development, application support, systems testing, and digital workflow improvement across NGO, UN, and health-sector environments. Currently serving as a Junior Applications Developer at Right to Care Zambia. Experienced in C#, .NET, PHP, JavaScript, React, SQL, relational databases, REST APIs, Git, testing, deployment, technical support and user training. I translate operational and data requirements into maintainable systems and have supported SmartCare, DHIS2 reporting, ETL processes and production applications used by programme and operations teams.

TECHNICAL SKILLS

Software development	C#, .NET, ASP.NET Core, PHP, JavaScript, TypeScript, React, Kotlin, HTML and CSS
Data and integration	SQL Server, PostgreSQL, SSIS, ETL, REST APIs, Swagger, relational data modelling and Power BI
Health information systems	SmartCare, DHIS2, HMIS, health data validation, reporting workflows, UAT and Ministry of Health stakeholder support
Delivery and quality	Git, Selenium, debugging, requirements analysis, secure access controls, technical documentation, deployment, training and production support

PROFESSIONAL EXPERIENCE

Junior Application Developer Apr 2026 - Present

Right to Care Zambia | Lusaka Zambia

- Lead the design, development and continuous improvement of internal enterprise applications using C#, PHP, JavaScript, SQL, and Microsoft Power Platform technologies.
- Work with HR, Finance, Operations, ICT and programme teams to translate functional workflow and data requirements into working software, database structures and controlled approval processes.
- Enhanced an early-stage Travel Automation repository into a live system covering requests, approvals, accommodation coordination, day-trip controls, audit history and reporting.
- Support the INSIGHT-DATIM system by reviewing application logs, testing functionality and collaborating with the Business Strategy Intelligence Unit to troubleshoot stored procedures and resolve system issues.
- Developing internal digital systems and workflows for employee exit clearance, human resources management and attendance tracking, incorporating role-based access controls, validation and audit trails.

Applications Developer Intern May 2025 - Mar 2026

Right to Care Zambia | Lusaka Zambia

- Supported application development, testing and maintenance of internal systems used by operational and programme teams.
- Built application modules and database functionality, investigated defects through code and SQL analysis, and improved data validation, reporting and access controls.
- Gathered requirements, prepared technical and user documentation, supported UAT and training, and converted user feedback into iterative enhancements.
- Designed the organisation's SharePoint intranet to centralise internal information, resources and collaboration.

Monitoring and Evaluation Assistant

Feb 2025

National Food and Nutrition Commission | Livingstone Zambia

- Analyzed district-level health indicators during a provincial performance review involving government departments, UN agencies and development partners, identifying outliers, inconsistencies and priority corrective actions.
- Contributed to evidence synthesis and an action tracker used to assign responsibilities and monitor programme and data-quality improvements.

Nutrition Information Systems Assistant

Jul 2024 - Jan 2025

United Nations Children's Fund – UNICEF Zambia | Lusaka Zambia

- Supported national nutrition information systems and reporting processes used by government and development partners across Zambia's 10 provinces.
- Worked with the Ministry of Health, National Food and Nutrition Commission and partners to improve reporting workflows, resolve system issues and strengthen data quality at facility level.
- Developed Power BI dashboards, assessed data quality and reporting trends, and helped raise DHIS2 nutrition reporting completeness above 95% through validation and corrective follow-up.
- Trained more than 30 district health information officers and nutrition focal points in system use, secure access, validation and reporting procedures.

Nutrition Information Systems Intern

Dec 2023 - Jun 2024

United Nations Children's Fund – UNICEF Zambia | Lusaka Zambia

- Supported implementation, optimisation and user adoption of a multisectoral digital information system across 17 districts in 6 provinces.
- Provided first-line support, analysed utilisation and reporting performance, conducted data-quality checks and converted user feedback into technical and operational improvements.
- Produced implementation reports and recommendations on cloud hosting, continuity, ownership and system sustainability; contributed to an estimated 30% improvement in adoption.

Software Engineer Intern

Jan 2023 - Dec 2023

Institute for Health Measurement Southern Africa | Lusaka Zambia

- Supported development, testing, integration and implementation of SmartCare Pro, Zambia's national electronic health record platform, using C#, .NET, React, Spring Boot and SQL Server.
- Worked with developers, Ministry of Health stakeholders and facility users to identify defects, validate system behaviour and translate operational feedback into improvements.
- Developed and supported SQL Server Integration Services ETL processes for health-data migration and validation, with structured defect analysis and technical documentation.
- Supported more than five UAT workshops with Ministry of Health personnel and facility users and followed critical defects through validation and resolution.
- Prototyped AI handwriting recognition using MyScript and e-ink tablets, demonstrating handwritten input flowing into SmartCare Pro.

Data Entry Clerk - Enumeration Team Lead

Apr 2022 - Jul 2022

Office of the Commissioner for Refugees | Kalumbila, Lusaka, Kaoma and Nchelenge Zambia

- Led six enumerators during a refugee verification and repatriation exercise implemented with UNHCR and supported over 5,000 interviews using ODK and KoboCollect.
- Entered, verified and reconciled information in case-management and biometric platforms while maintaining approximately 99% data accuracy and confidentiality.

Information Technology Officer

May 2020 - Dec 2021

Propenum College of Education | Lusaka Zambia

- Managed user accounts, technical support, website administration, backups, connectivity and digital learning platforms, sustaining approximately 99% system availability.
- Developed the college's first website using PHP and WordPress, administered its Learning Management System and trained staff and students in digital tools.

EDUCATION

Bachelor of Computer Science (Merit) - National Institute of Public Administration (NIPA) | 2017-2021

High School Grade 12 Certificate - Kabulonga Boys High School | 2013-2015

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Oracle Cloud Infrastructure Foundations Associate | 2025
- Records and Information Management – United Nations | 2025
- Information Security Awareness Assessment - United Nations| 2025
- UNICEF Data Analysis professional development | 2025
- Statistics - IBM | 2025
- Google Data Analytics Professional Certificate | 2024
